ECO POTMAKER

a lifetime's supply of Seedling Pots – from nothing more than old newspapers

The ingenious **Eco Pot Maker** from Burgon & Ball transforms strips of newspapers into 3 different sizes of paper seedling pot, in seconds.

Each pot is sufficiently strong to hold together while the seedlings are becoming established but biodegradable enough to quickly break down when planted in the ground.

- No need to store hundreds of plastic pots over the winter
- No disturbance of young roots from transplanting

The Burgon & Ball Eco Pot Maker produces 1", 1.5" and 2" paper pots.

Made from FSC certified Beech.

RRP £17.95

Available from all good garden centres. For stockist and mail order information see website www.burgonandball.com
